

Award winning motion-activated projections in Care

OM INTERACTIVE

Established in the UK in 2005, we are pioneers in the design of interactive projections for multi-sensory use. Our fixed and mobile award-winning systems are backed by independent research praising their ability to help people feel connected, energised & uplifted. As an intervention for dementia care it is proving to be particularly beneficial, helping staff and family members to see the person behind the dementia.

INTERACTIVE PROJECTIONS IN CARE SETTINGS

At OMI we've long understood the benefits that visual/aural stimuli can have in encouraging:

- **Sensory experiences**
- **Emotional wellbeing**
- **Movement & participation**
- **Conversation & connection**

See our latest
Research Study
omi.uk

It is widely acknowledged that all those in care benefit from regular opportunities to actively:

- **Take part rather than passively watch**
- **Unwind with a physical, calming activity**
- **Stretch, compete, think and be challenged**
- **Socialise and enjoy meaningful activities together**

"It's moving to see the impact the Mobii table has. The therapeutic benefits are incredible, and we've seen families having a great time as they experience the table alongside their loved one."

**Martyn Dawes,
Home Manger of Caddington Grove, Hamberley Care**

Recent care research assessing wellbeing continues to support the claims that regularly involving people in activities which stimulate movement, communication and mental engagement will always be beneficial and ultimately enhance their quality of life.

In those who have used our systems, care professionals have witnessed positive changes in:

- Emotional stability
- Overall mood/outlook
- Sense of self-worth/belonging
- Physical effort/energy levels
- Willingness to socialise
- Ability to enjoy shared activity

“We are delighted with the positive impact the Mobii system is having on our residents living with dementia, their families and our team members. The interactive nature, the great variety of activities combined with the ability to move the system to those who are less mobile makes it a truly person-centred resource.”

Jackie Pool,

UK Director of Memory Care & Programming, Sunrise Senior Living and Gracewell Healthcare

CARE SUITE - NOW CONTAINING OVER 100 APPS!

This Suite has been specifically designed to include all of the important elements necessary to stimulate, engage, relax and provide opportunities for shared enjoyment.

The wide variety of Apps include:

- Interactive quizzes to encourage discussion and maintain memory and recall
- Scenes and sounds from nature including virtual water effects and therapeutic colouring
- Social games with rising difficulty & rewards promoting physical dexterity and joint effort
- Nostalgic themes and music to stimulate conversation and support reminiscence work
